Ellen Page Was Sexually Outed/Harassed as a Teen Actress by Brett Ratner, Director of 2006's 'X-Men: The Last Stand', Woody Allen, Before Coming Out as Gay in 2014

Ellen Page recently came out as transgender. She had previously come out as gay and is married to a man, who is supportive. However, she was a young teenager actress in the X-Men franchise when she was apparently sexually harassed on set by Brett Ratner, a disgraced director. Woody Allen was somehow also involved. Ratner reportedly outed her on set.

> "I was eighteen years old. He looked at a woman standing next to me, ten years my senior, pointed to me and said: 'You should f*** her to make her realise she's gay.' He was the film's director, Brett Ratner. I was a young adult who had not yet come out to myself. I knew I was gay, but did not know, so to speak. I felt violated when this happened," Page wrote of Ratner's comment.

She came out as gay in 2014, several years after these incidents. This reminds me of when Ellen DeGeneres shared her history of sexual abuse, another lesbian in Hollywood. The pattern is clear. Sexual abuse is a grooming mechanism for homosexual men to continue their kind on young boys. Sexual abuse however is also a mechanism for creating lesbians, who as abuse victims identity sexually as something for which men are not a part of: lesbianism. There may be a genetic component to homosexuality, but the idea that there is no environmental factor such as abuse is contradicted by experience.
